

CONSTRUCTION NOTICE

Vision Zero Arterial Traffic Calming: 26th Ave SW

What are the changes we're making?

On 26th Ave SW between SW Barton St and SW Roxbury St, we will install parking lane lines. These changes to the street will slow traffic and make the street safer for people walking, rolling, and biking.

When will construction happen, and how long will it take?

We are planning to begin to install these improvements before the end of the year. We anticipate this work to be completed over a couple of weekends. Please note this work is weather dependent and subject to change.

How will construction impact you?

During construction, you can expect lane reductions while crews paint the roadway. Some driveways may be impacted temporarily and you may see some parking restrictions while the work is happening.

Project funding

These projects are funding by the Move Seattle Levy that was approved by Seattle voters in 2015.

The Arterial Traffic Calming program is part of Vision Zero at the Seattle Department of Transportation (SDOT). We work on projects that help people travel at safer speeds. Street design interventions to help us reach safe speeds is one of the core elements of our Vision Zero Safe System Approach.
