Overview

Rotary Park pump track,
Kittitas, WA

Background

Friends of West Seattle Bike Park is proposing the establishment of vibrant yet modest public bike-skills park in West Seattle at Westcrest Park.

This outdoor recreation opportunity promotes health, wellness, community engagement and access to nature in an urban environment while fostering a sense of ownership and pride among West Seattle residents by offering opportunities for volunteerism, educational programs, events, and workshops focused on biking skills, trail stewardship, and environmental conservation.

03

What is a bike park?

Torguson Park pump track in North Bend

High level

A mountain bike park is a designated area or facility specifically designed and built for mountain biking enthusiasts. These parks typically feature a variety of trails and obstacles that cater to different skill levels and preferences within the sport.

They may include features like downhill trails, cross-country trails, dirt jumps, pump tracks, technical terrain, and obstacles such as berms, drops, and rock gardens.

Pump Track

A loop that consists of a series of rollers and berms. It's a thrilling experience because users experience an up-and-down feeling of weightlessness, similar to the drops and climbs in a roller-coaster, but on a micro-level.

Port Angeles

Skills Area

A designated skills area equipped with features such as rock gardens, boulders and skinnys to help riders develop and improve their biking skills in a controlled environment.

Duthie Hill, Issaquah

Port Gamble

Jump Lines

A diverse network of three to five trails catering to beginner, intermediate, and advanced riders. Trails will vary in difficulty and terrain, offering a range of experiences from gently sloping, rollable table tops to large steep-faced jumps.

Duthie Hill, Issaquah

Summit Ridge, Black Diamond, WA

Additional Features

Accessibility

Trails and features will be designed with accessibility in mind that enhance the experience for a wider range of riders. This might include minimizing obstacles that could pose challenges to riders with mobility impairments, providing alternative routes or features that accommodate different abilities, and ensuring that the park is welcoming and inclusive to riders of diverse backgrounds.

Duthie shelter with tool stand

Amenities

The envisioned park design includes amenities such as picnic tables, a drinking fountain and a tool stand to enhance the overall visitor experience and encourage prolonged stays.

Safety Measures

Safety is a top priority, and the park will implement well proven design measures that allow riders to push themselves as much as desired, in a controlled environment.

Port Angeles ADA-accessible pump track

Additional Benefits

Education

Education in mountain bike parks is vital for safety, skill development, and environmental stewardship. Bike parks create space for the community to offer programs for all skill levels, teaching bike handling and trail etiquette.

Multi-age drop clinic at Duthie Hill

Physical Activity

The intended goal is to get as many people of all ages and abilities outdoors getting exercise in a fun, communal environment.

Volunteerism

Trails are designed, built and maintained through community involvement. This not only lowers investment but also builds a community of ownership and local pride.

Women-led volunteer trail maintenance

Current Seattle Bike Parks

Within the city of Seattle, there are limited options for the mountain bike community to learn, practice, and connect with others in a safe environment.

Raging River State Forest

What we looked for in locations

Accessibility

We focused on areas that provide a wide range of amenities and features that promote use for the whole community including access to parking, public transportation, and existing restrooms.

Additionally, we focused on areas that are within existing City of Seattle park management.

Safety

To ensure a safe rider experience for all users, the site needs to feature a slope/grade that is within 1–4% decline.

Complimentary

The area needs to partner well with existing and future uses of the land and activities such as hiking and other recreational sports.

Boise, ID bike park with adjacent dog park

Evaluated Sites

**ROTARY
VIEWPOINT**

**RIVERVIEW
PLAYFIELD**

**WESTCREST
PARK**

Rotary Viewpoint

- A highly accessible site with natural flowing lines

- Too steep

Riverview Playfield

-Wonderful unused forested land with access to parking, bathroom and natural features

-Potential slope hazards near Skills/Jump Area

Westcrest Park

An ideal site for mix of
features, abilities, and
neighborhood access

Boise Bike Park

Similar size bike park
in Boise, ID

05

Next Steps

Pump track, Swan Creek Park, Tacoma

Proposed Timeline
